

1. Mkdir <dir name> mkdir is used to create a directory and dir name is the name of the directory.

2. Remove directory ?

Rm-r and rm-d are used to remove directory, rm-r command deletes non-empty directories.

3. Make a copy of the directory ?

Cp (file-name ) (dir-name ) cp is use to copy and file-name is source file which you want to copy and dir-name , where to copy.

4. Move or rename a file ?

Mv file-name dir-name/ rename-file : mv is used to move file and file-name move to dir-name having new name rename.

5. Create an empty file ?

Touch command is used to create an empty file .

6. Remove multiple files with a single command ?

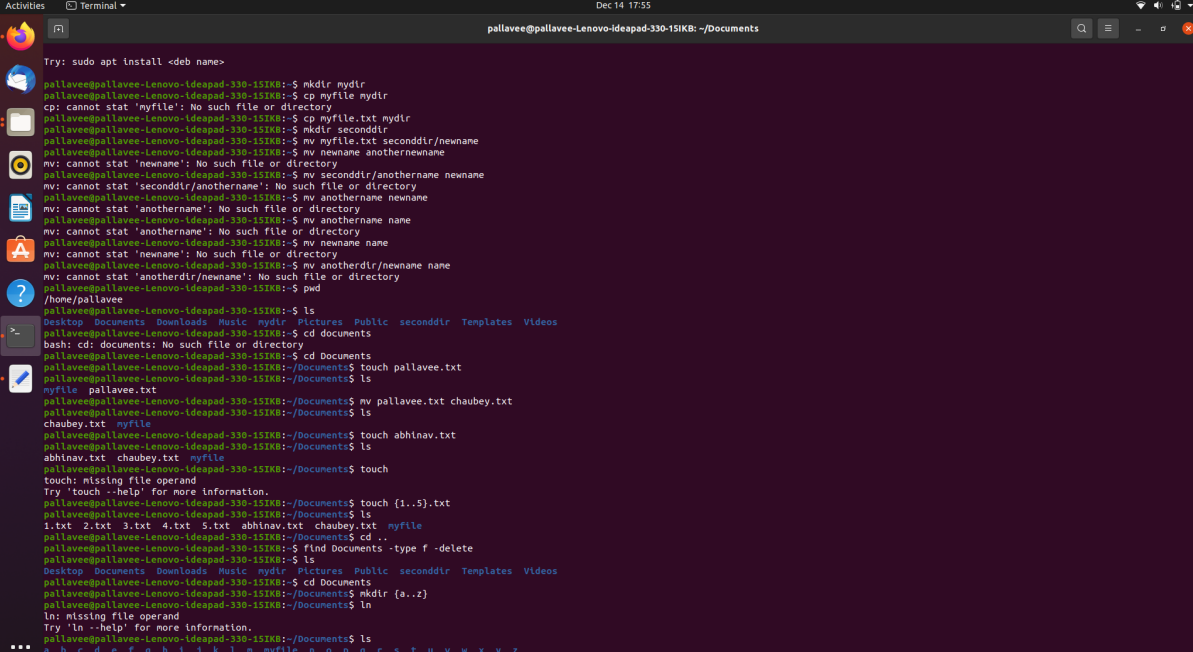

Rm with multiple file names .

7. Remove content from folder without removing folder ?

Find my folder -name "\*.txt" - delete

8. Create multiple folders(a-z) with a single command ?

mkdir{a...z}

```
Try: sudo apt install <deb name>
